Nationality: Nigerian

ORCID: 0000-0003-3387-4188 • Google Scholar • MathSciNet: 1494599 • Scopus: 57204799122 • Web of Science: LKJ-6393-2024 • ResearchGate

Research Profile

My research lies in numerical optimization and fixed point theory, and moves between theory and computation. On the theoretical side, I establish the existence and uniqueness of solutions and study the properties of the operators involved. On the algorithmic side, I design and analyse iterative methods (proximal, splitting, projection, inertial and conjugate-gradient) for optimization problems, variational inequalities, monotone inclusions and fixed point problems. The work spans Hilbert spaces and nonlinear settings such as CAT(0)/Hadamard spaces and Riemannian manifolds, and extends to computation, with applications in supply-chain networks, machine learning, image restoration, robotics and portfolio selection.

- **64+ peer-reviewed publications** (2022–2027), in journals including *J. Optim. Theory Appl.*, *Commun. Nonlinear Sci. Numer. Simul.*, *Math. Comput. Simulation* and *Optimization*; **32 in JCR Q1 journals**; first and/or corresponding author on 25.
- **Google Scholar (Oct. 2026):** 341 citations, *h*-index 10, i10-index 12.
- **International collaboration** with researchers in Thailand, China, Taiwan, Korea, Pakistan, India, Saudi Arabia, Romania, Poland, Ireland, Canada and South Africa; **13 conference and seminar talks**.
- **Co-investigator on two funded research grants** (Nigeria and Saudi Arabia), 2025–2026.

Research Interests

Numerical and nonsmooth optimization; variational inequalities, monotone inclusions and equilibrium problems; splitting, proximal and conjugate-gradient methods, including Riemannian and vector optimization; fixed point theory in Banach, metric and geodesic spaces (CAT(0), Hadamard, hyperbolic), with emphasis on enriched and multivalued mappings; integrating artificial intelligence and machine learning into the design and analysis of methods for challenging problems in optimization and nonlinear analysis; and applications to data science, signal and image recovery, and supply-chain networks.

Academic Appointments

Nov. 2025 – present	**Postdoctoral Researcher**, School of Mathematical Sciences, Chongqing Normal University, China Research on splitting and proximal algorithms for variational inequalities and monotone inclusions, with applications in optimization and data science.
Oct. 2024 – present	**Lecturer I**, Iconic Open University, Sokoto, Nigeria Undergraduate teaching in mathematics in an open and distance learning setting.
Jul. 2024 – Jun. 2025	**Postdoctoral Researcher**, King Mongkut's University of Technology Thonburi (KMUTT), Bangkok, Thailand Fixed Point Theory and Applications Research Group (host: Prof. Poom Kumam).
Oct. 2023 – Aug. 2025	**Lecturer II**, Department of Mathematics, Sule Lamido University Kafin Hausa, Nigeria

Apr. 2023 – Jul. 2023 **Visiting Researcher (Erasmus+ Mobility)**, North University Centre at Baia Mare, Technical University of Cluj-Napoca, Romania
Host: Prof. Vasile Berinde. The visit started a continuing collaboration on enriched mappings in geodesic spaces.

Dec. 2019 – Sep. 2023 **Assistant Lecturer**, Department of Mathematics, Sule Lamido University Kafin Hausa, Nigeria

Education

2021 – 2024 **Ph.D. in Applied Mathematics**, King Mongkut's University of Technology Thonburi (KMUTT), Bangkok, Thailand
Thesis: *Approximation Methods for Fixed Point and Convex Optimization Problems* (defended 22 Nov. 2023; awarded Feb. 2024).
Advisors: Prof. Poom Kumam, Assoc. Prof. Songpon Sriwongsa and Prof. Vasile Berinde. Supported by a Petchra Pra Jom Klao Ph.D. Scholarship.

2018 – 2019 **M.Sc. in Pure and Applied Mathematics**, African University of Science and Technology (AUST), Abuja, Nigeria
Thesis: *Iterative Methods for Approximation of Fixed Points of Certain Multivalued Mappings in Hadamard Spaces*. Supported by a Pan African Materials Institute (PAMI) Scholarship.

2013 – 2017 **B.Sc. in Mathematics**, Sokoto State University (SSU), Sokoto, Nigeria
Thesis: *Modifications of Hill Cipher Algorithm Using Similarity Matrices and Involutory Key*. Best Graduating Student (Pioneer Set).

2009 – 2012 **Nigeria Certificate in Education (Mathematics & Physics)**, Jigawa State College of Education, Gumel, Nigeria

Research Grants

2025 – 2026 **Co-investigator, TETFund Institution-Based Research (IBR) Grant**
Optimization of Extreme Learning Machine Model via Conjugate Gradient Technique: Application to Classification of Tomato Leaf Diseases. Tertiary Education Trust Fund (TETFund), Usmanu Danfodiyo University, Sokoto, Nigeria (IBR ID: UDUS-IBR-2025-10-81).

2025 – 2026 **Co-investigator, Deanship of Graduate Studies and Scientific Research Grant**
Optimization of Blood Supply Chain Network through Numerical Variational Inequality Technique. Jouf University, Saudi Arabia (Grant No. DGSSR-2025-02-01481).

Fellowships, Scholarships and Awards

Oct. 2025 Postdoctoral Fellowship, Chongqing Normal University, China.

Jul. 2024 Postdoctoral Fellowship, King Mongkut's University of Technology Thonburi, Thailand.

Apr. 2023 Erasmus+ Mobility Grant, Technical University of Cluj-Napoca, Romania.

Sep. 2022 Best Presentation Award, 3rd International Workshop on Applied Nonlinear Analysis (IWANA 2022), Thailand.

Mar. 2021 Best Graduating Student – Pioneer Set, Sokoto State University, Nigeria.

Nov. 2020 Petchra Pra Jom Klao Ph.D. Scholarship (Grant No. 67/2563), KMUTT, Thailand.

Mar. 2019 Pan African Materials Institute (PAMI) Internship Grant, AUST, Abuja, Nigeria.

Jan. 2018 Pan African Materials Institute (PAMI) M.Sc. Scholarship, AUST, Abuja, Nigeria.

Apr. 2017 Gold Medal, National Mathematics Competition for University Students (NAMCUS 2017), National Mathematical Centre, Abuja, Nigeria.

May 2016 Award of Excellence in Leadership, National Association of Mathematics Students, SSU Chapter.

Teaching Experience

Courses taught	Elementary Mathematics I, II and III; Foundations of Mathematical Analysis I and II; Lebesgue Measure and Integration; Mathematical Methods I; Discrete Structures (Sule Lamido University and Iconic Open University, 2019–present).
Teaching interests	Real and functional analysis, convex analysis and optimization, numerical analysis and numerical optimization, linear algebra, and computational mathematics with MATLAB and Python.

Professional Service

2023 – present	**Reviewer**, *Mathematical Reviews* (MathSciNet), American Mathematical Society.
Ongoing	**Referee** for international journals in fixed point theory, nonlinear analysis, variational inequalities and vector optimization.
2021 – present	**Member**, KMUTT Fixed Point Theory and Applications Research Group (KMUTT-Fixed Point Lab), Thailand.

Skills and Languages

Computing	MATLAB (proficient), LaTeX (proficient), Python (intermediate; including Pymanopt), Java (intermediate), Microsoft Office (proficient).
Languages	English (fluent), Hausa (native); Arabic, Chinese and Thai (elementary).
Personal	Teamwork, leadership, flexibility, active listening. Enjoys badminton, football and swimming.

Publications

Reverse chronological order. Brackets give the Web of Science index (SCIE/ESCI), the journal's best JCR quartile and its 2025 Journal Impact Factor (JCR released June 2026).

Theses

- **Ph.D.:** *Approximation Methods for Fixed Point and Convex Optimization Problems*, KMUTT, Thailand, 2024. link
- **M.Sc.:** *Iterative Methods for Approximation of Fixed Points of Certain Multivalued Mappings in Hadamard Spaces*, AUST, Nigeria, 2019. link

Conference and Seminar Presentations

[T1] *Fixed point properties of saturated and unsaturated contractive mappings via geodesic perturbations*. 28th International Annual Symposium on Computational Science and Engineering (ANSCSE28), Thammasat University, Thailand, Jul.–Aug. 2025.

[T2] *Fixed point iterative techniques for solving nonlinear convex optimization problems* (joint with P. Kumam). 10th Conference on Mathematics & IT: Research and Education (MITRE-2025), Chişinău, Republic of Moldova, 26–29 Jun. 2025.

[T3] *Substantial geodesic spaces and their geometric inequalities for fixed point theory and optimization*. 4th International Conference and Workshop on Applied Nonlinear Analysis (ICWANA 2024), Chonburi, Thailand, 6–8 Aug. 2024.

[T4] *Strictly pseudocontractive mappings beyond linear spaces*. SYNASC 2023 – Workshop on Iterative Algorithms for Approximating Fixed Points of Various Contractive Type Operators (IAFP 2023), Nancy, France, 11–14 Sep. 2023.

[T5] *Variational inequality and proximal point scheme for enriched nonexpansive mappings in CAT(0) spaces*. 14th International Conference on Fixed Point Theory and its Applications (ICFPTA 2023), Transilvania University of Braşov, Romania, 11–14 Jul. 2023.

[T6] *Golden ratio approaches to a solution of monotone-type variational inequality problem in certain geodesic spaces*. 23rd International Conference on Computational and Mathematical Methods in Science and Engineering (CMMSE 2023), Cádiz, Spain, 3–8 Jul. 2023.

[T7] *Nonexpansive-type mappings with viscosity iteration in Hadamard spaces*. 2nd International Symposium (ISIM) & International Student Workshop (ISWIM) on Interdisciplinary Mathematics, University POLITEHNICA of Bucharest, Romania, 28–30 Jun. 2023.

[T8] *Variational inequality problems beyond convex settings*. 4th International Conference and Summer School "Numerical Computations: Theory and Algorithms" (NUMTA 2023), Calabria, Italy, 14–20 Jun. 2023.

[T9] *Geodesic convexity in fixed point theory* (seminar talk). Seminar on Nonlinear Operators and Differential Equations, Babeş–Bolyai University, Cluj-Napoca, Romania, 18 May 2023.

[T10] *Properties of enriched nonexpansive mappings in Hadamard spaces*. 3rd International Workshop on Applied Nonlinear Analysis (IWANA 2022), Chonburi, Thailand, 5–6 Sep. 2022 — **Best Presentation Award**.

[T11] *Convergence theorems for fixed points of enriched contraction and enriched nonexpansive mappings in Hadamard spaces*. 25th International Annual Symposium on Computational Science and Engineering (ANSCSE25), Khon Kaen University, Thailand, Jun. 2022.

[T12] *A viscosity-type scheme for optimization problems in Hadamard spaces with applications*. International Workshop on Digital Image Processing and Machine Learning (IWDM 2021), Thailand, 20–22 Aug. 2021.

[T13] *Iterative methods of approximation of fixed points of certain multivalued maps*. 38th Annual Conference of the Nigerian Mathematical Society, University of Nigeria, Nsukka, 18–21 Jun. 2019.

Other Workshops Attended

- 9th International Workshop on Nonlinear Analysis, Fixed Point Theory and Applications (NAFPTA), North University Centre at Baia Mare, Romania, 29 May 2023.
- International Workshop and Computational Science Summer School (CSSS 2023): Data Science and Modelling in Industries, KMUTT, Bangkok, Thailand, 7–10 Mar. 2023.

Referees

Prof. Poom Kumam
Department of Mathematics,
Faculty of Science
King Mongkut's University of
Technology Thonburi (KMUTT)
Bangkok 10140, Thailand
poom.kum@kmutt.ac.th

Prof. Vasile Berinde
Department of Mathematics and
Computer Science
North University Centre at Baia
Mare, Technical University of
Cluj-Napoca
Baia Mare 430122, Romania
vasile.berinde@mi.utcluj.ro

Prof. Yekini Shehu
School of Mathematical Sciences
Zhejiang Normal University
Jinhua 321004, China
